- Ukrainian: B2 - Upper Intermediate

ABOUT ME

Web development captured my interest and swiftly became a significant part of my life, intertwining with my existing hobbies of snowboarding and robotics. I am constantly honing my Front End development skills, creating a harmonious blend of passion and proficiency.

PROJECTS

- Created a personal website for a [winery](#) using HTML, CSS, JS and Bootstrap grid.
- I developed and integrated a website for thematic game reviews using the WordPress CMS. Additionally, I created websites using HTML, CSS, and jQuery, including projects like [Mobile](#), [Slovo](#), [gamega.org](#), [MHW](#). I also provided technical support for various other websites. As part of my responsibilities, I conducted SEO optimization and implemented measures to enhance website performance, ensuring faster loading times.
- Took part in the development of the financial services website [Mundo.expert](#). My tasks included the layout of the template from the .fig file into pixel-perfect using PUG, SASS technologies using GULP. It also required cross-browser and semantic layout. The team used the Git version control system.
